Nerve Stimulator

TENS-T250

FDA

TENS Current stimulation is for :

Symptomatic relief and management of chronic and/ or as an adjunctive treatment in the management of post-surgical and post- traumatic acute pain problems.

FDA CLEARED DEVICE FOR PAIN RELIEF

Features & Specification

- Two Channels
  Treats two body areas simultaneously
- Three selectable modes:
  Conventional, Burst, Modulation
- Easy Selection
  For Modes, Intensity, Pulse Width & Pulse Rate
- Lightweight & Battery Operated
  Easy to operate any time any where
- Metal Belt Clip
  To clip the device.

About TENS Therapy

In TENS therapy, a small, battery-operated device delivers low-voltage electrical current through the skin via electrodes placed near the source of pain. It stimulates the nerves in the affected area and sends signals to the brain that block the pain perception. TENS is proven to be an effective therapy to mask pain.

TENS Applications

Low back pain | Shoulder pain | Foot or ankle pain | Cervical spasms/pain | Hip strain
