

INSTRAMED

i.on Line

Perfect  
for you.

**The most complete and customizable line of AEDs on the market**, offering different models, functions, and accessories to adapt to your needs and ensure maximum performance and safety in emergency situations.

i.on i.on auto i.on pro

**With a wide range of models and functionalities, the i.on line of AEDs was developed to handle any emergency scenario with excellence and reliability.** It enables use by both healthcare professionals and laypersons, maximizing the chances of achieving its purpose: saving lives.

### i.on LED

An efficient and intuitive solution, featuring LED indicators and voice prompts to guide the user. Available with rechargeable and

non-rechargeable batteries. Options include an integrated handle, patient selection button, CPR feedback, integrated handle, rechargeable or non-rechargeable batteries, loMT function, and automatic mode for lay users.

### i.on LCD

In addition to all the features of the i.on LED, it includes a 4.3' color LCD display, showing ECG, battery status, usage time, shocks delivered, and other

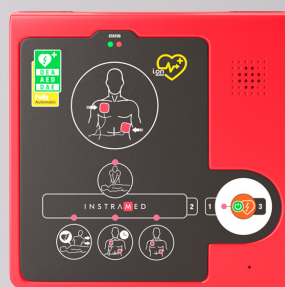

essential information. Offers the same optional features as the LED version, plus 3-lead ECG cable monitoring.

### i.on PRO

An advanced model for healthcare professionals. Operates as an AED or manual defibrillator with charges up to 360 J. Features a touchscreen

display and compatibility with CPR feedback and loMT. Uses only rechargeable batteries.

### i.on AUTO <sup>(1)</sup>

Available for the LED and LCD versions, this function performs defibrillation automatically without user intervention, making it ideal for public

spaces and untrained operators.

## Patents & Warranty

Instramed is a pioneer in Brazil with exclusive patents for single-button operation and loMT technology, enabling remote management and geolocation of devices. All models in the i.on line come with a 1-year warranty, ensuring the quality and reliability that Instramed is known for.

Check the technical specifications of each version in their respective brochures.

(1) Specifically, this version of the equipment does not have a CE certificate.
